High Performance Products - Anti Skid Surfacing & Traffic Management

A wide selection of high performance bauxites, granites and basalts, are available for anti-skid surfacing and traffic management schemes. These products are suitable for heavily trafficked areas, because of their hard wearing and skid resistance properties. Areas of application include, surfacing of major roads, roundabouts, demarcation lanes, paths and cycle ways.

Domestic and Corporate Products - Resin & Bitumen Bound Gravel for Surface Dressing

A wide selection of natural coloured aggregates, provide an attractive low maintenance surface, which is suitable for light traffic use. These products provide an aesthetic, long lasting surface, for a vast range of applications from domestic driveways to large corporate landscaping schemes. The attractive, traditional appearance of the various gravels and chippings makes them highly suitable for high profile heritage sites, where a sympathetic appearance is crucial.
